

Drop stamp belts are used as liftingbelts in the forging industry.

Drop stamp belts have a core of polyester multifilament yarn and top and bottom layers made out of cotton.

Drop stamp belts are treated with a temperature resistant impregnation in order to increase durability. The impregnation increases the friction coefficient.

FIELD OF APPLICATION:

- Lifting belts for drop stamps
- Heavy industry

OUR DROP STAMP BELTS ARE CHARACTERISED:

- Optimal power transmission
- Long life cycle
- High friction coefficient
- High quality standard
- Special impregnation
- Maintenance-free
- Strongly woven
- Closed edge

PRODUCTION PROGRAM:

- Rolls of 25 m
- Standard dimensions on stock
- Other dimensions on request
- Thicknesses from 10, 12, 14 up to 16 mm

Drop stamp belt

STANDARD DIMENSIONS:

Width (mm)	Thickness (mm)		
	10 - 11	12 - 13	14 - 15
160	530 kg	650 kg	
180	600 kg	730 kg	
200	700 kg	840 kg	
220	770 kg	930 kg	
250	870 kg	1'100 kg	
280		1'200 kg	
300		1'300 kg	
350		1'500 kg	
400		1'700 kg	
450		1'900 kg	
500		2'100 kg	2'500 kg
550		2'300 kg	2'700 kg
600		2'500 kg	3'000 kg

allowable Ram weight
including upper die
