

Our woven packings are woven out of different raw materials, they are used for isolation and the heat protection against high temperatur. The packings are also used as seals in furnace and generators.

FIELDS OF APPLICATION:

- Heating furnace
- Thermal power plants
- Vacuum furnace
- Sealing material

SPECIFICATIONS:

The packings may be made out of the following fibres:

- Aramid up to 250°C
- E-Glassfibre up to 450°C
- HT-Glassfibre up to 750°C
- Glassfibres doubled with stainless steel threads (V4A)

OUR PACKINGS ARE CHARACTERISED BY:

- Fireproof
- High abrasive resistance
- High dimensional stability
- Densely woven core

PRODUCTION PROGRAM:

- Rolls up to 20 m in length
- Maximum width 250 mm
- Maximum thickness 35 mm
- Reinforced with stainless steel (V4A) thread
- Coatings: Graphite, Vermiculite (mica)
- Taylor made webbings to the needs of our clients

Aramid-Packing

60 mm * 16 mm

HT-Glas-Packing

55 mm * 35 mm

E-Glas-Packing

75 mm * 25 mm
