

The sieve cleaners are made out of untreated cotton. Sieve cleaners are used as hoppers in sifter machines of the flour milling industry.

The webbing is very dense. The density increases with the absorption of the left over moisture during the sifting process.

PRODUCTION PROGRAM:

- Box of 500 pieces
- Belt on demand
- Coatings on demand
- Other dimensions on demand

OUR COTTON SIEVE CLEANERS ARE CHARACTERISED BY:

- 100% raw cotton
- High strength
- High rigidity
- Dimensionally stable
- Long lasting
